At the Reproductive Health & Fertility Center (RHFC), we understand that the cost of treatment is an important factor when you are choosing a fertility clinic. In recognition of this, we are dedicated to keeping our fertility treatments affordable. We will always give you honest, up front pricing information with no hidden costs. Only prescription drug expenses are not included, as they are billed separately by your pharmacy.

We have developed the following estimated costs for Semen Analysis, Intra Uterine Insemination, IVF, IVF with ICSI, and Frozen Embryo Transfer. This is our best estimate as to the costs of the identified treatment plan, excluding the cost of medications. Please realize that these are estimates only; individual treatment plans may vary.

**Semen Analysis** **\$100 - \$210\*\***

**Intra Uterine Insemination (IUI) – Partner** **\$2,115**

An IUI cycle typically includes monitoring of ovarian stimulation by ultrasound, one procedure of sperm preparation and one procedure of insemination. Medication cost is additional.

**Intra Uterine Insemination – Donor AID-IUI** **\$1,595-\$2,095**

An IUI cycle typically includes monitoring of ovarian stimulation by ultrasound, one procedure of sperm thawing and one procedure of insemination. Medication cost and donor sperm are additional.

**Conventional IVF** **\$14,365**

Conventional IVF usually includes monitoring, egg retrieval, insemination of eggs, extended embryo culture, assisted hatching, embryo transfer, conscious sedation and supplies. Medication cost is additional.

**Without Transfer - \$13,215: includes embryo cryopreservation & 1 year of embryo storage**

**IVF with ICSI** **\$17,160**

IVF using ICSI usually includes monitoring, egg retrieval, and insemination of eggs with ICSI (>10 oocytes), extended embryo culture, assisted hatching, embryo transfer, conscious sedation and supplies. Medication cost is additional.

**Without Transfer - \$16,010: includes embryo cryopreservation & 1 year of embryo storage**

**Frozen Embryo Transfer (FET)** **\$5,290**

A FET usually includes monitoring of uterine lining using ultrasound, thawing of embryos, and procedure of embryo transfer guided by abdominal ultrasound. Medication cost is additional.

\*\* Price varies due to complexity.

Prices are subject to change without notice.

**\*\*\*Most patients without insurance coverage qualify for special discounts on selected IVF procedures from the above listed prices. Please contact the business office for details.**
